

In de volgende opgaven staan letters op de plaats van getallen.  
 Reken uit hoeveel elke letter waard is.

$$i + j = 30$$

$$i - j = 20$$

$$i = \dots\dots$$

$$j = \dots\dots$$

$$k \times l = 32$$

$$k : l = 2$$

$$k = \dots\dots$$

$$l = \dots\dots$$

$$e : f = 7$$

$$f : 7 = 2$$

$$e = \dots\dots$$

$$f = \dots\dots$$

$$m \times n = 96$$

$$96 : n = 12$$

$$n = \dots\dots$$

$$m = \dots\dots$$

$$a + b = 7$$

$$a = b + 1$$

$$a = \dots\dots$$

$$b = \dots\dots$$

$$c - d = 4$$

$$d + d = c - 1$$

$$c = \dots\dots$$

$$d = \dots\dots$$

$$p \times q = 176$$

$$p + q = 30$$

$$p = \dots\dots$$

$$q = \dots\dots$$

$$r \times s = 304$$

$$r - s = 30$$

$$r = \dots\dots$$

$$s = \dots\dots$$
